SUMMARY

Highly proficient B.Tech CSE candidate specializing in Python, Java, and SQL. Expertise in engineering and deploying high-impact projects (AI application, web platform), leveraging DSA and OOP principles to build scalable, robust codebases. Demonstrated strong team leadership and effective collaboration during competitive initiatives.

PROFESSIONAL SKILLS

Programming: Python, SQL, C/C++, Java, HTML, CSS

AI/ML & Data Analysis: Scikit-learn, Pandas, NumPy, Transformers, Matplotlib

Web & Cloud Technologies: MySQL, Firebase, Docker, Git, Flask, Streamlit

Development Tools & BI: MS Office-Excel, Tableau, Power BI, Jupyter Notebooks, Google Colab, Visual Studio Code, Vapi (AI), Keras, Kaggle

Core Concepts: Data Structures & Algorithms (DSA), OOPs, Computer Networks, Probability & Statistics

Professional Skills: Leadership, Multi-Tasking, Team Work and Team Management, Problem-solving

TRAINING

C & C++ Development (Softsynth Software Solution Private Limited, Offline)

July 2023 – August 2023

- Implementation: Engineered** a real-time game loop and implemented non-blocking I/O for smooth, responsive user control using C/C++.
- Data Structure:** Designed and implemented **dynamic array-based growth** logic to manage the snake's body, ensuring efficient memory utilization and scalable performance.
- Logic:** Developed comprehensive **collision detection logic** for boundaries and self-collision, effectively managing game state transitions and end conditions.

Java Development (with DSA) (Coding Blocks, Offline)

June 2024 – January 2025

- Modeling/Design: Employed Object-Oriented Programming (OOP)** principles in Java to model abstract game components, specifically designing base classes for piece inheritance and behavior.
- Core Logic: Implemented complex move validation logic** for all six chess pieces (including castling), significantly reducing rule-breaking errors and detect critical game conditions, including **check, checkmate, and stalemate**.

Data Science & Machine Learning (Udemy, Online)

June 2025 – Present

- Leveraged Python, NumPy, and Pandas for data manipulation and feature engineering; developed dataframes, created visualizations (Matplotlib), and deployed analytical apps using Flask and Streamlit..

PROJECTS

PrepWise AI-driven Interview Preparation Platform

- Engineered a user-friendly and performant SPA using React.js/Next.js and architected real-time Firestore schemas for practice data storage.
- Implemented core conversational logic with Vapi AI and the Gemini API to generate dynamic, human-like interview questions and provide objective, actionable feedback.
- Secured robust user access and data persistence via comprehensive Firebase authentication and state management.

Generative AI Exchange Program AI Application Development & Prompt Engineering

- Developed and deployed AI applications using **Vertex AI**, the **Gemini API**, and **Streamlit**.
- Engineered prompts for Gemini and Imagen models, and built a **Multimodal RAG** system to analyze rich documents.

CERTIFICATION

Frontend Development Virtual Internship

IBM | July 2025 – August 2025

Generative AI Exchange Program

Google Cloud Skills Boost | May 2025 – July 2025

- Learning Skills:** Prompt Design, Vertex AI, Gemini and Imagen APIs, Streamlit, Generative AI

EDUCATION

U.I.E.T Kurukshetra

B.Tech in Computer Science and Engineering (7.76 CGPA)

Aggarwal Public School

Higher Secondary (88 percent)

Aggarwal Public School

Matriculation (86 percent)

Kurukshetra, Haryana

Nov 2022 – July 2026

Faridabad, Haryana

April 2021 – March 2022

Faridabad, Haryana

April 2019 – March 2020

EXTRACURRICULAR ACTIVITIES & ACHIEVEMENTS

- Competitive Coding Champion:** Secured **1st place** out of 50+ participants in an Intra-College Coding Competition, utilizing **C++** and advanced **Data Structures and Algorithms (DSA)** for optimal solutions.
- Leadership & Community Impact:** Contributed **120+ hours** to the **National Service Scheme (NSS)**, and **led a 5-person team** in a literacy drive and strong project coordination and organizational skills.
- Sustained Programming Initiative:** Actively participated in external coding contests (e.g., **Coding Ninjas**, **LeetCode**). Developed proficiency in **Java** for rapid prototyping and utilized **Git/GitHub** for version control in challenge submissions.
